

PRESS RELEASE

On 18.12.2012 was held a Conference “ e-Accounting in Republic of Macedonia, organized by Datalab MK along with their partner Makedonski Telekom AD-Skopje. The conference was attended by more than 240 people, representatives from accounting bureaus all over Macedonia that had the privileged to see the advantages of the new PANTHEON system. The purpose of this new system that is presented on the Macedonian market for the first time is facilitating the work of the accountants, working electronically, saving paper and company resources.

With this new system that will be provided on the Macedonian market by Makedonski Telekom starting 2013, will allow companies to have access to the most advanced business programming solutions and accountants to electronic exchange of documents and at any time insight into clients' data. For the accounting bureaus “PANTHEON e-Accounting “ gives an opportunity to develop business consulting and financial analysis services, saves time and facilitates data and documents exchange. At the same time it offers more clarity and better management of the business processes as well as opportunities for expanding the business abroad.

“PANTHEON e-Accounting“ allows a complete support for your business including: creating orders, invoices, human resources, accounting, manufacturing and business intelligence. It is suitable for any kind of business, no matter of size and activity, for anyone that needs a complete support and integration of its business processes. Using this system, the companies get simple and quick access to data, security and back-up, all-time upgrades to new versions of the software and no additional costs for licenses and/or servers.

Macedonia continues to walk the path towards the creation of modern, safe and flexible business environment. The efforts to create favorable business environment for domestic and foreign investors, reformations in tax system are just a few of the steps that leads the Macedonian business environment towards e-society. The support from the business environment has a key role in modernization of the Macedonian market.
